

● Cleaning brushes for anilox rolls (flexo/gravure)

STEEL BRUSHES for ceramic cylinders (PVC body + stainless steel wires) et BRASS BRUSHES for chrome cylinders (PVC or wooden body + brass wires).

The fineness of our strands is unique (strand of 76/1000th mm).

The 6,5 x 11 cm size of our brushes make them easy to handle, while the beech wood or PVC base make them resistant to solvents and water.

Our brushes contribute to a perfect finish for unclogging and maintenance operations.

They can be used with COBRA, CLEAN products range.

CLEANING BRUSHES

For anilox rolls & plates

● Cleaning brushes for plates

Our PLATE BRUSHES are made of PVC body + synthetic hair or wooden body + horse hair.

They ensure a good mechanical action without damaging the plate. Their specially-designed geometry makes them easy to handle for on –or off– machine cleaning.

Clean plates give clean prints!

3 models are available: short model, big model, square model.

Our brushes can be used with all our QUICK'WASH products range.
